SUMMARY

Motivated Computer Engineering student with a strong focus on Full-Stack Software Development and Data & AI. Experienced in end-to-end web application development from UI design to deployment. Currently expanding backend capabilities alongside applying machine learning to real-world problem-solving. Passionate about learning new technologies and seeking an internship opportunity to deliver measurable impact to the organization.

EDUCATION

Bachelor of Engineering (Computer Engineering) of Srinakharinwirot University

(2024 – Present)

WORK EXPERIENCE

Computer Engineering Student Leader (2024 – Present)

- Represented students and coordinated academic workshops and activities.
- Fostered department engagement and student-faculty collaboration.

Metaverse Presentation Assistant (2025)

- Assisted lectures on Metaverse, AR/VR, and AI integration.
- Built interactive presentation materials and live demos.

Robotics Teaching Assistant (2026)

- Taught basic robotics and programming to high school students.

- Mentored hands-on labs and configured hardware equipment.

Data Science Intern Botnoi Group (2026)

- Developed and optimized ML models through feature engineering.
- Partnered with teams to deliver applied AI solutions.

Google Cloud, Big Data & GenAI Training (2026)

- Certified in Google Cloud, Big Data, and Generative AI fundamentals.

PROJECTS

BrainFit Application

- Built a mobile brain-training app to enhance memory and analytical skills.

Employment Data Gap Analysis

- Analyzed Computer Engineering employment gaps using Machine Learning.

Water Level Detection (DOH Hackathon)

- Built an AI-driven vision system to estimate flood water levels from submerged vehicle wheels.

SWU Run Register (SWU Run Together 2026)

- Developed a full-stack runner registration web platform.

WELLYNC (True Innovation)

- Developed a chronic care platform with predictive AI health analytics.

Skin Cancer Screening & Classification System

- Built a ResNet-50 Deep Learning model for skin cancer classification.

Note: Additional project details are available at https://github.com/KhaNomThai
